17.	Executive Summary

## 1. Target Identification & Wallet Metadata

<b>Wallet Address</b>	TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx
<b>Blockchain</b>	TRON (TRX) -- Mainnet
<b>Address Type</b>	EOA -- TRC-20 compatible
<b>First Activity</b>	2023-10-03 13:34:30 UTC
<b>Last Activity</b>	2026-03-20 09:03:09 UTC (TRX dust inflow)
<b>Wallet Age</b>	898 days (~2.5 years)
<b>Total Records</b>	249 (62 transfer records   187 transaction records)
<b>Frozen Balance</b>	83,771,083.97 USDT -- PERMANENTLY FROZEN by Tether since February 10, 2026
<b>Portfolio Value</b>	\$83,771,099.51 (Arkham snapshot 2026-03-22 -- frozen / legally inaccessible)
<b>Freeze tx hash</b>	c0761ec96049dcf6b56d019834b0ae43c8502887db734e6045e29057f6db7fc2
<b>Freeze rank</b>	#1 Largest single-wallet USDT freeze on TRON of all time (USDTBanList, March 2026)
<b>Public attribution</b>	No named entity or alias. Arkham: no entity label. Specter Analyst (X, Feb 10 2026): confirmed NOT pig-butchered -- laundered illicit funds with upstream link to eXch (no-KYC exchange). Companion wallet holding ~\$20M identified -- not frozen.

**Sources:** [tronscan.org/#/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx](https://tronscan.org/#/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx) | [intel.arkm.com/explorer/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx](https://intel.arkm.com/explorer/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx) | [usdtbanlist.com/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx](https://usdtbanlist.com/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx)

## 2. Financial Overview

Metric	Value	Notes
<b>USDT Total Inflows</b>	\$137,075,083.97	51 inbound events from 37 unique senders
<b>USDT Total Outflows</b>	\$53,304,000.00	11 outbound events to 7 unique recipients
<b>USDT Frozen Balance</b>	\$83,771,083.97	61.1% of deposits -- permanently frozen Feb 10 2026
<b>Operator Extracted</b>	\$53,304,000.00	38.9% withdrawn before freeze -- 10 outflows Feb-Dec 2025
<b>stUSD Received</b>	111,991,026	Single inflow Aug 2025 -- staked USDT derivative, no outflow
<b>TRX Balance</b>	~129.11 TRX	Dust from 170 gas provisioning events -- negligible
<b>Lifetime Throughput</b>	\$190,379,083.97	Combined in + out

Sources: Transfer Data -- all figures data-verified

### 3. Asset Portfolio & Coin Provenance

Token	Balance	Provenance	Status
USDT	83,771,083.97	Laundered funds -- eXch upstream link confirmed	FROZEN / BLACKLISTED
stUSD	111,991,026	Aug 2025 from TMStAjRQHDZ8b3d... -- staked USDT derivative, no outflow	REVIEW
TRX	~129.11	170 gas provisioning events -- multiple senders	LEGITIMATE
FREEZE(TG:JFU U888)	2,664 (3x888)	TTpWebvdseQ32s -- post-freeze scam token x3	SCAM
U S D T	25.33	USDT-spoofing phishing token	PHISHING
ha138 com	138.14	Known spam distributor	SPAM
YZGPF.COM	88.89	Domain phishing airdrop	PHISHING
GWB / JTK / SUNFE	Dust	Various spam senders	SPAM

stUSD note: 111,991,026 stUSD received Aug 13 2025 from TMStAjRQHDZ8b3dyXPjBv9CNR3ce6q1bu8 -- no corresponding outflow in the data. Either still held, unwrapped outside the data window, or part of a layering operation. Not counted in the USDT frozen balance -- it is a derivative token. FREEZE(TG:JFUU888): Three sends of 888 tokens each on Feb 23-24 2026 -- 13 days post-freeze. Scam token named to impersonate a freeze notification. Telegram handle embedded as social engineering lure. Zero interaction observed.

### 4. Activity Lifecycle Analysis

Phase	Period	Description	Volume
Activation	Oct 3 2023	100 USDT test send from TYdt7MHoR, then \$8.23M immediately after	\$8.23M
Early accumulation	Oct-Dec 2023	Three further inflows from TYdt7MHoR. Wallet built to \$32M in 2.5 months	\$32M total
Dormancy	Jan-Mar 2024	No significant activity	--
Single inflow	Apr 2024	\$5.37M from TTnFePHUrFWW3xVB2Z9iaCsAB3k5TWMcju	\$5.37M
Major capitalisation	Nov 24 2024	\$46M at 07:37 + \$44M at 07:45 UTC -- \$90M in 8 minutes from two coordinated addresses	\$90M

Phase	Period	Description	Volume
Secondary top-up	Dec 2024	\$9.7M from THqaCGcYAS	\$9.7M
Outflow phase	Feb 2025	First outflow: \$5M to TJeCqcTc8	\$5M out
Active distribution	May-Dec 2025	Series of \$3M-\$21M outflows. Total extracted \$53.3M across 10 transactions	\$53.3M out
stUSD inflow	Aug 2025	111.99M stUSD from TMStAjRQ -- derivative, no outflow	Complex
Final dormancy	Jan-Feb 2026	Only micro-USDT dust (total \$4)	--
FREEZE	Feb 10 2026	Tether AddedBlackList() -- 83,771,083.97 USDT permanently frozen	\$83.77M FROZEN
Post-freeze	Feb-Mar 2026	Scam FREEZE tokens. TRX dust. No USDT movement possible	--

**CRITICAL -- Nov 24 2024: \$90 million in 8 minutes. \$46M at 07:37 UTC and \$44M at 07:45 UTC from two distinct addresses. Synchronised timing and near-identical amounts confirm a single controller splitting exposure across sister wallets. This is the defining capitalisation event.**

## 5. Transaction Microstructure & Full TX Ledger

<b>Profile</b>	249 total records across 898 days. 178 of 187 transaction records are TransferContract (TRX dust). 9 TriggerSmartContract calls handle all USDT movements.
<b>Counterparties</b>	37 unique senders. 7 unique recipients. Extreme outbound concentration.
<b>Protocol use</b>	Zero DeFi, zero staking, zero bridges. Single asset, single purpose.
<b>Probe txs</b>	Two zero-value USDT outflows immediately preceding large transfers -- standard address verification before moving significant funds.

## 6. Account Structure Engineering

<b>Structure</b>	Single EOA, single primary asset (USDT), zero protocol interaction. Pure accumulation and distribution node.
<b>Gas strategy</b>	Operator never directly held TRX. Gas came from 170 external micro-TRX inflows totalling 129.11 TRX. Largest single TRX inflow was 100 TRX from TYdt7MHoR -- the dominant USDT sender -- confirming one operator controls gas and inflows.
<b>No yield-seeking</b>	\$83M held without staking, lending, or any return-generating activity. A legitimate holder of \$83M would seek yield. Its absence confirms the wallet's sole purpose: illicit funds storage where minimising footprint takes priority over returns.
<b>Outflow protocol</b>	All outflows in round numbers. Zero-value probe sends precede large transfers. Consistent operational methodology -- experienced, disciplined operator.

Sources: Transaction Data (method calls verified) | Transfer Data

## 7. Transaction Flow Architecture

### Inflow Tiers

Tier	Address	Amount	Role
Phase 1	TYdt7MHoR1CenyYUdeCZ477oTfLHoLqWkC	\$32,009,554 (4 txs + 100 TRX gas)	Original operator -- built initial balance Oct-Dec 2023
Phase 2A	TLji56QV5rrVVtmZG5poqGvp7rU1pjfmA5	\$46,000,000 (1 tx, Nov 24 07:37)	Major capitalisation -- sister wallet
Phase 2B	THqaCGcYASRcYCPSLqEU95z6BnzEtGxfWP	\$53,700,000 (2 txs, Nov+Dec 2024)	Major capitalisation -- sister wallet to 2A
Phase 3	TTnFePHUrFWW3xVB2Z9iaCsAB3k5TWMcju	\$5,365,412 (1 tx, Apr 2024)	Intermediate funder
eXch (upstream)	Confirmed by Specter on-chain tracing	Partial	No-KYC exchange -- illicit funds origin

Address	Total Received	Txs	Note
TFcLds8SWxc4WoaJvk5pXuJd6wuZkG2ZiN	\$26,000,000	2	Largest recipient -- suffix G2ZiN
TCdLhRdHPBtZyNTva76eZLGCENJ5nSUPPp	\$18,000,000	4	Recurring -- suffix nSUPPp
TJeCqcTc8yvVWaeL6iZ6texy6J2Lg99i6x	\$5,000,000	1	One-time outflow Feb 2025
TVbAAh7sjudfxWqJVbcPfyApGQjBKjwZaE	\$3,000,000	1	One-time outflow Jul 2025
TGmibxq5P4J4zWn1sm2xkGGdiw283GgBcx	\$1,304,000	1	One-time outflow Dec 2025

Suffix address clustering confirmed: Outflow addresses share suffixes (nSUPPp, G2ZiN, g99i6x) with minor inflow sender addresses. The same programmatic infrastructure generates both inflow and outflow addresses -- a closed, controlled cluster operated by a single entity. eXch upstream link: Specter Analyst confirmed on X that tracing the inflows shows part of the funds originated from eXch -- a no-KYC exchange documented for facilitating laundering of stolen crypto assets. Specter also

## 8. Counterparty Analysis

Address	Role	Volume	Attribution
TYdt7MHoR1CenyYUdeCZ477oTfLHoLqWkC	Phase 1 controller	\$32,009,554 in + 100 TRX gas	UNATTRIBUTED -- original operator

eXch exchange (upstream)	Confirmed partial source	Partial (Specter)	No-KYC exchange -- illicit facilitator
Companion wallet (unnamed)	Dormant linked wallet	~\$20M (Specter)	NOT FROZEN -- critical active lead

Sources: [Transfer Data | x.com/SpecterAnalyst/status/2021172045141225969](https://x.com/SpecterAnalyst/status/2021172045141225969)

## 9. The Freeze Event

**TETHER BLACKLIST -- February 10, 2026 83,771,083.97 USDT permanently frozen Hash: c0761ec96049dcf6b56d019834b0ae43c8502887db734e6045e29057f6db7fc2 Rank: #1 Largest Single-Wallet USDT Freeze on TRON of All Time**

<b>Mechanism</b>	Tether's AddedBlackList() smart contract function. Once called, the balance is irrecoverable without Tether's explicit reversal. No reversal at this scale has ever occurred in Tether's operational history.
<b>Official reason</b>	Not publicly disclosed by Tether -- standard practice.
<b>OSINT reason</b>	Laundered illicit funds with confirmed upstream link to eXch (Specter Analyst, X, Feb 10 2026). Almost certainly coordinated with a law enforcement request, consistent with Tether's documented cooperation with agencies including the FBI and Secret Service.
<b>Operator awareness</b>	Three FREEZE(TG:JFUU888) scam tokens sent Feb 23-24 2026 confirm operator or associates are still monitoring. Awareness of the freeze is confirmed.

### Top 10 Largest USDT Freezes of All Time (USDTBanList, March 19, 2026)

Rank	Chain	Address	Amount	Date
#1 TRON	TRON	TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx	\$83.7M USDT	Feb 10, 2026
#2 TRON	TRON	TTr4STG8SMVrPaFYZEvFjZoerPGFTD8vUR	\$55.0M USDT	Jul 15, 2024
#3 TRON	TRON	TGTsSX3L2BF7jcYW1695k63uTmU7YBVGQu	\$50.0M USDT	Jul 15, 2024
#4 TRON	TRON	TCtVtrdy8sSXGMx1QYUjMrAvaulpduC2Aa	\$50.0M USDT	Jan 10, 2026
#1 ETH	Ethereum	0x661be0562b31e9e8...1d749	\$100.0M USDT	Jan 13, 2022

## 10. Airdrop & Spam Token Analysis

Token	Amount	Sender	Date	Classification
<b>FREEZE(TG:JFU U888)</b>	2,664 (3x888)	TTpWebvdseQ32sHzMfKFPuEo5jprX7jdXJ	Feb 23-24 2026	SCAM -- post-freeze social engineering
<b>U S D T</b>	25.33	TGkAq9aLe3PF5LUgZeuUF6MvgnnuyGDil2	May 2024	PHISHING -- USDT spoof
<b>ha138 com</b>	138.14	TREysTVRxEAHD4269SpUZzLHt2QFM2G9on	Dec 2025	SPAM
<b>YZGPF.COM</b>	88.89	TXQn8X8QUbEqbEUqvZw9ZGns4XYV1wm91t	Mar 2024	PHISHING -- domain
<b>GWB</b>	2.64	TDHgP6AbcSrXTfMa3xsKkck64xLKZP3u2G	Dec 2023	SPAM
<b>JTK</b>	0.0001	TUXVRyd9SxPq7sjtZudLNoYsrQCU23dgwo	Oct 2023	SPAM
<b>SUNFE</b>	0.0001	TMqMDgzccWzGXCeWb58mwtax6nAzQs5vGB	Dec 2024	SPAM

Zero interaction with any spam or phishing token confirmed.

Sources: [Transfer Data](#)

## 11. Smart Contract & Protocol Interaction

Contract	Address	Interaction	Note
<b>USDT (TRC-20)</b>	TR7NHqjeKQxGTCi8q8ZY4pL8otSzgjlj6t	9 TriggerSmartContract transfer calls -- a9059cbb	All USDT movements
<b>Tether Blacklist</b>	TR7NHqjeKQxGTCi8q8ZY4pL8otSzgjlj6t	AddedBlackList() -- Feb 10 2026	Freeze -- irreversible
<b>stUSD contract</b>	Unknown	1 inbound transfer Aug 2025 -- 111.99M stUSD	Staked USDT derivative
<b>DelegateResourceContract</b>	--	1 event	Minimal energy delegation

Zero DeFi. No SunSwap, JustLend, or yield protocols. The wallet has never been used for anything other than receiving, holding, and distributing USDT. Its simplicity is deliberate -- a clean, unencumbered storage node designed to minimise on-chain footprint.

Sources: [Transaction Data \(method names verified\) | tronscan.org](#)

## 12. Security Posture

<b>Post-freeze reality</b>	The Tether blacklist renders key management moot. The operator retains the private key but cannot move the frozen USDT. The 129 TRX (~\$7) remains accessible but is economically insignificant.
<b>Pre-freeze discipline</b>	Probe transactions (zero-value USDT) used before large outflows -- standard operational security. Gas managed externally. Disciplined, experienced execution.
<b>Operator awareness</b>	FREEZE(TG:JFUU888) scam tokens (Feb 23-24 2026) confirm operator or associates are still monitoring the wallet 13 days post-freeze.

Sources: [Transfer Data](#) | [Transaction Data](#)

## 13. AML / Risk Assessment

Criterion	Finding	Assessment
<b>Tether blacklist</b>	ACTIVE -- 83,771,083.97 USDT permanently frozen Feb 10 2026	CRITICAL FAIL
<b>Confirmed illicit funds</b>	Specter: 'illicit funds that were laundered into this wallet'	CRITICAL FAIL
<b>eXch upstream exposure</b>	eXch confirmed upstream -- no-KYC exchange / illicit facilitator	FAIL
<b>Mixer / tumbler</b>	No direct mixer -- eXch used upstream as obfuscation layer	INDIRECT
<b>Darknet / hack exposure</b>	eXch connection elevates risk -- crime type unconfirmed	ELEVATED
<b>Source of funds</b>	Partially traceable -- eXch confirmed; dominant senders unattributed	OPEN
<b>Outflow destinations</b>	All 7 recipients unattributed -- \$53.3M already distributed	OPEN
<b>Structuring pattern</b>	Round-number outflows (\$5M, \$3M, \$21M) over 10 months -- layering	FAIL
<b>Pig-butchering</b>	Explicitly ruled out by Specter Analyst on X	PASS (negative)
<b>stUSD anomaly</b>	111.99M received, no outflow visible -- status unclear	OPEN
<b>Overall Risk Score</b>	CRITICAL -- confirmed illicit storage, Tether blacklist, eXch upstream	CRITICAL

Sources: [x.com/SpecterAnalyst/status/2021172045141225969](https://x.com/SpecterAnalyst/status/2021172045141225969) | [usdtbanlist.com/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx](https://usdtbanlist.com/address/TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx) | [Transfer Data](#)

## 14. Notable Events & Anomalies

ID	Event	Severity
A1	#1 Largest USDT freeze on TRON ever: 83,771,083.97 USDT frozen Feb 10 2026. Second largest across all chains. Largest single-wallet enforcement action on TRON in Tether's operational history.	CRITICAL
A2	\$90M in 8 minutes (Nov 24 2024): \$46M at 07:37 and \$44M at 07:45 UTC from two addresses. Coordinated capitalisation -- single controller splitting exposure across sister wallets.	CRITICAL
A3	eXch confirmed upstream: Specter Analyst traced inflows to eXch -- a no-KYC exchange documented for laundering stolen crypto assets.	CRITICAL
A4	\$53.3M extracted before freeze: Operator distributed 38.9% across 10 outflows Feb-Dec 2025. 10-month staged distribution -- experienced, methodical operation.	HIGH
A5	Dormant companion wallet (~\$20M): Specter identified a linked wallet holding ~\$20M not yet frozen. Most significant active investigative lead.	CRITICAL
A6	Suffix address clustering: Outflow addresses share suffixes (nSUPPp, G2ZiN) with inflow sender addresses -- same programmatic infrastructure controls both ends.	HIGH
A7	FREEZE(TG:JFUU888) scam (Feb 23-24 2026): 3x888 tokens sent post-freeze. Social engineering targeting the operator. Wallet confirmed actively monitored.	MEDIUM
A8	stUSD 111.99M inflow, no outflow (Aug 2025): \$112M stUSD derivative -- no corresponding outflow. Status unclear: held, unwrapped, or part of layering.	HIGH

## 15. Ownership Attribution Model

Hypothesis	Probability	Supporting Evidence	Against
<b>Professional money laundering operation</b>	<b>70%</b>	Tether blacklist confirmed; eXch upstream; \$90M coordinated 8-min delivery; zero yield-seeking; round-number outflows; suffix-clustered address infrastructure; 10-month staged distribution	No confirmed LE designation published; exact crime type not yet disclosed
<b>Individual illicit actor</b>	<b>20%</b>	Simple wallet structure; scale consistent with individual HNW holder	\$90M 8-minute coordination implies team infrastructure; too disciplined for solo
<b>Exchange / OTC intermediary</b>	<b>10%</b>	Scale and USDT-only profile vaguely consistent	eXch link and no retail counterparties rule out legitimate attribution

Attribution confidence: HIGH for illicit classification. MEDIUM for specific actor type. The dormant companion wallet (~\$20M, identified by Specter, not frozen) is the most actionable investigative lead. Identifying it and tracing TYdt7MHoR (Phase 1 builder) and the Nov 2024 sister wallets (TLji56QV / THqaCGcYAS) would reveal the operation behind this record-breaking freeze.

## 16. Overall Investigation Conclusion & Confidence Assessment

### Overall Assessment: CONFIRMED ILLICIT USDT STORAGE NODE -- PERMANENTLY FROZEN -- RECORD #1 TETHER BLACKLIST ON TRON

TXNYeYdao7JL7wBtmzbk7mAie7UZsdgVjx is the most consequential wallet investigated in this report series. It received \$137M in USDT over 2.5 years, distributed \$53.3M across 10 months, and had \$83.77M frozen by Tether on February 10, 2026 -- the largest single-wallet USDT freeze on TRON ever recorded.

#### Key verified facts (all data-verified):

- Total received: \$137,075,083.97 USDT from 37 senders across 51 inbound events
- \$90M in 8 minutes (Nov 24 2024) -- coordinated capitalisation, two sister wallets
- Total distributed: \$53,304,000 across 11 outflows to 7 recipients (Feb-Dec 2025)
- Frozen: 83,771,083.97 USDT on Feb 10 2026 -- rank #1 largest TRON freeze of all time
- eXch upstream link confirmed by Specter Analyst on-chain tracing
- Explicitly NOT pig-butchering (Specter confirmed)
- Companion wallet ~\$20M dormant at linked address -- not frozen (Specter)
- Suffix address clustering confirmed across both inflow and outflow addresses
- Zero yield-seeking, zero DeFi, zero retail -- pure illicit storage and distribution

Attribute	Confidence	Basis / Caveat
Wallet Classification	HIGH	Tether blacklist + Specter OSINT -- illicit storage confirmed
Fund Provenance (partial)	MEDIUM-HIGH	eXch confirmed upstream; dominant senders unattributed
AML Assessment	HIGH	CRITICAL across all criteria -- no ambiguity
Ownership Identity	LOW	No named entity; operation type confirmed, actor unknown
Outflow Safety	LOW	\$53M distributed to unattributed cluster -- status unknown
stUSD Position	LOW	111.99M received, no outflow -- status unclear
Data Integrity	HIGH	All figures verified against Transfer Data and Transaction Data

# EXECUTIVE SUMMARY

TXNYeYdao7JL7wBtmzkb7mAie7UZsdgVjx | TRON TRC-20 | 2026-03-22 14:23 UTC

## WHAT IS THIS WALLET?

This wallet was an illicit USDT storage and distribution node operating on TRON for 2.5 years. It received \$137 million from a small network of unattributed addresses, distributed \$53.3 million to another small cluster of unattributed recipients, and was permanently frozen by Tether on February 10, 2026 with \$83.77 million inside -- the largest single-wallet USDT freeze on TRON in Tether's operational history. Analyst Specter confirmed the funds are laundered illicit proceeds with a traced upstream link to eXch, a no-KYC exchange known for facilitating the laundering of stolen crypto assets. The funds are not pig-butchering related.

## THE NUMBERS

FROZEN BALANCE	TOTAL RECEIVED	DISTRIBUTED	TOTAL TXs	LAST ACTIVE
<b>\$83,771,083.97</b>	<b>\$137,075,083</b>	<b>\$53,304,000</b>	<b>249</b>	<b>2026-03-20</b>
WALLET AGE	PRIMARY ASSET	FREEZE RANK	RISK SCORE	ATTRIBUTION
<b>898 Days</b>	<b>USDT Only</b>	<b>#1 on TRON</b>	<b>CRITICAL</b>	<b>Illicit Oper.</b>

## THE MONEY FLOW

<b>SOURCES 37 senders eXch upstream \$137M in</b>	<b>THIS WALLET Storage node 2.5 years \$137M received</b>	<b>DISTRIBUTED 7 recipients \$53.3M out Feb-Dec 2025</b>	<b>FROZEN \$83.77M Feb 10 2026 Irrecoverable</b>
---	---	--	--

## KEY FINDINGS

<b>1</b>	Permanently frozen. Tether's AddedBlackList() was called on February 10, 2026, locking 83,771,083.97 USDT -- the largest single-wallet freeze on TRON of all time. The funds are irrecoverable without Tether's reversal, which has never occurred at this scale.
<b>2</b>	Confirmed illicit. Specter Analyst traced the inflows and confirmed these are laundered illicit proceeds -- NOT pig-butchering -- with an upstream link to eXch, a no-KYC exchange known for facilitating the laundering of stolen crypto assets.
<b>3</b>	\$90M in 8 minutes. On November 24 2024, \$46M and \$44M arrived within 8 minutes from two coordinated sister wallets. A single controller split exposure -- the defining capitalisation event.
<b>4</b>	Operator partially escaped. \$53.3M (38.9%) was distributed across 10 outflows over 10 months before enforcement caught up. The destination addresses are unattributed.

- 5 Companion wallet still active. Specter identified a linked wallet holding approximately \$20M that has NOT been frozen -- the most significant open investigative lead.
- 6 eXch is the confirmed upstream source. This no-KYC exchange operates without identity verification, making it a preferred rail for converting stolen crypto into USDT.

RISK VERDICT

CRITICAL

**Confirmed illicit storage node -- permanently frozen by Tether.**

This is not a probability assessment -- it is a confirmed enforcement outcome. The Tether blacklist, the eXch upstream link, and Specter's on-chain analysis collectively leave no legitimate interpretation. **DO NOT INTERACT.** Any funds sent to this address are irrecoverable, and any funds received from associated addresses may trigger secondary AML flags.
